QGIS Application - Bug report #8346
Render caching breaks ctrl-click to expand selection

2013-07-22 10:05 PM - Nyall Dawson

Status:	Closed			
Priority:	Severe/Regression			
Assignee:				
Category:	Map Canvas			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:		**Copied to github as #:**	17130	

Description

If render caching is enabled, then the selection is not updated when ctrl-clicking to select additional features.

Steps to reproduce:

1. Enable render caching

2. Select a single polygon

3. Hold ctrl, click a second polygon. The visible selection is not updated, but in the background the new feature is selected

Expected behaviour:

The second polygon clicked will be shaded in the selection color
