

QGIS Application - Bug report #8368

Missing EPSG:102067 projection

2013-07-27 11:13 AM - Michal Zimmermann

Status: Closed	
Priority: Normal	
Assignee:	
Category: Projection Support	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: end of life
Crashes QGIS or corrupts data: No	Copied to github as #: 17145
Description	
<p>EPSG:102067 was recently replaced by EPSG:102065 in master version. However, this cannot be used with the Czech WMS servers, as they support just the official national system, which is EPSG:102067. Is it possible to put it back to the list of predefined coordinate systems?</p>	

History

#1 - 2014-01-30 11:40 PM - Paolo Cavallini

- Target version changed from Version 2.0.0 to Future Release - High Priority

#2 - 2014-02-07 05:16 AM - Giovanni Manghi

- Priority changed from High to Normal

There is no crash or data corruption, so I'm lowering the priority.

#3 - 2017-05-01 01:09 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

#4 - 2019-03-09 04:04 PM - Giovanni Manghi

- Resolution set to end of life

- Status changed from Open to Closed

End of life notice: QGIS 2.18 LTR
