did you added the key?

```
gpg --keyserver keyserver.ubuntu.com --recv 997D3880
gpg --export --armor 997D3880 | sudo apt-key add -
```

My mistake - that was the issue.

I just wasn't clear as to the necessity of adding that public key...the instructions are somewhat ambiguous (to the linux noob!!!)

Thank you for your help and reply!
