QGIS Application - Bug report #8426
Transparency mangles WMS layers

2013-08-08 02:58 AM - Jonathan Moules

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Web Services clients/WMS			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	17195	

Description

I have a WMS. When I set transparency in QGIS, the layer becomes very ugly - colours become pseudo colours etc. See attached for the result of request QGIS makes to the WMS, and what QGIS shows on the screen for just 1% transparent and 70% transparent.
Looking at the requests made to the WMS - they're all requesting the exact same file, so transparency is being done client side.

History

#1 - 2013-08-08 03:01 AM - Jonathan Moules

QGIS weekly a13cdf8 - windows 7 x64

#2 - 2013-08-08 03:35 AM - Giovanni Manghi

- Category set to Web Services clients/WMS

seems to work fine here, please provide a url.

My WMS is internal only and cannot be shared. Also my QGIS doesn't have access to internet so I can't test external ones.

can't you install and test qgis in a pc outside of your work environment?

#6 - 2013-08-08 03:48 AM - Jonathan Moules

Possibly, but that won't let me test my given URL.

#7 - 2013-08-08 03:52 AM - Giovanni Manghi

but we will know if is a general issue or is about your wms server.

#8 - 2013-10-16 04:10 AM - Jonathan Moules

The server is a GeoServer 2.3.5 install
This happens with QGIS 2.0

Sorry, it's still internal only I'm afraid. Hopefully soon (ha!) our security folks will finally approve it (or even respond!).
