

QGIS Application - Bug report #8447

Label \$area and field

2013-08-11 12:59 PM - Lene Fischer

Status: Closed	
Priority: Normal	
Assignee:	
Category: Labelling	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: invalid
Crashes QGIS or corrupts data: No	Copied to github as #: 17216
Description	
<p>I'm trying to set a label with the function \$area. This works fine. Also with formatting ex 1 decimal.</p> <p>With \$area 'text' the formatting for decimals fails</p>	

History

#1 - 2013-08-11 03:08 PM - Giovanni Manghi

- Operating System deleted (Windows and MAC)
- Assignee set to Larry Shaffer

I had once reported the same issue here #6981 and it was closed because in the expression builder there are now number formatting functions. It is up to you to keep this open or closing it for the same reason.

#2 - 2013-08-11 03:11 PM - Nathan Woodrow

- Resolution set to invalid
- Status changed from Open to Closed

The format option doesn't work on anything but pure numbers being returned. Once you use || you are returning a string and we can't format that. Use the format_number function
