

QGIS Application - Feature request #8454

QgsFields: Implement container methods

2013-08-11 11:33 PM - Matthias Kuhn

Status: Open	
Priority: Normal	
Assignee:	
Category: Unknown	
Pull Request or Patch Supplied:	Resolution:
Easy fix?: No	Copied to github as #: 17223
Description	
Concerns C++ and Python.	
C++: Implement the iterator and const_iterator things, so we can do e.g.:	
Q_FOREACH(QgsField f, fields)	
Python:	
Should this be a dict or a list? Either	
for fieldname, field in fields.iteritems():	
or	
for field in fields:	
should be possible
