Affected QGIS version: master	Regression?: No
Operating System: 1.8	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: invalid
Crashes QGIS or corrupts data: No	Copied to github as #: 17228
Description	
<p>Hola, tenemos problemas con un gps con conexión USB al PC, tengo instalado QGIS 1.8 en Windows 7 64 bits, el tema es el siguiente, conectamos el GPS reconoce el puerto USV, descargar los datos, cierre los qgis, abro de nuevo y nos da error "nombre . capa gpx? tipo waypoint = no válido y no se puede añadir al mapa "alguien sabe por qué sucede esto? gracias</p> <p>Hi, we have problems with gps usb connection to the pc, I have installed qgis 1.8 on windows 7 64 bits, the themes shows, connect the GPS recognizes the port, download the data, close the qgis, open again and we fails "nombre.gpx layer? waypoint type = not valid and can not be added to the map" anyone knows why this happens? thanks</p>
