

QGIS Application - Bug report #8466

wrong resizing when rotating composer shapes (composer)

2013-08-14 01:54 AM - Richard Duivenvoorde

Status: Closed	
Priority: Normal	
Assignee: Nyall Dawson	
Category: Map Composer/Printing	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: end of life
Crashes QGIS or corrupts data:	Copied to github as #: 17234

Description

When you rotate a shape (like triangle) in composer it size changes, while the size should NOT change.

Looking into the code, it seems that there is some code which tries to resize the enclosing rectangle, but this resizing is applied to both the rectangle AND the object. In the case of the triangle, the triangle sticks out of the rectangle, which cause repaint problems also.

This bug manifests itself also when resizing a label, related to: #7933

History

#1 - 2013-08-14 02:05 AM - Richard Duivenvoorde

- Category set to Map Composer/Printing

#2 - 2013-12-01 03:11 AM - Nyall Dawson

- Assignee set to Nyall Dawson

#3 - 2017-05-01 01:09 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

#4 - 2019-03-09 04:04 PM - Giovanni Manghi

- Resolution set to end of life

- Status changed from Open to Closed

End of life notice: QGIS 2.18 LTR
