Crashes QGIS or corrupts data:	Copied to github as #: 17245
Description	
<p>There doesn't seem to be any help for "add Oracle Table" when the "help" button is pressed. This is weird because Jurgen linked to it on github back in May (though that link is 404 now - https://github.com/qgis/Quantum-GIS/blob/master/resources/context_help/QgsOracleNewConnection-en_US).</p> <p>The current link - https://github.com/qgis/Quantum-GIS/blob/master/resources/context_help/QgsOracleNewConnection</p> <p>Windows - d61cb25</p>
