

QGIS Application - Bug report #855

quit GRASS Edit - selected tool becomes inactive though still selected

2007-12-06 03:23 AM - Maciej Sieczka -

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: GRASS	
Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 10914

Description

1. add some GRASS vector
2. select the 'Identify fetures' tool
3. identify a polygon or 2
4. open GRASS Edit
5. select **any** tool in the GRASS Edit, don't do anything
6. quit GRASS Edit

As you can see the 'Identify fetures' tool is still selected (pressed in), but not active. If you want to activate it back, you have to select some other tool, then select 'Identify fetures' tool again. Quite puzzling.
