QGIS Application - Bug report #8552
unavailable WMS url blocking project load

2013-09-02 08:46 AM - Gavin Fleming

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Project Loading/Saving			
Affected QGIS version:	1.8.0		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:	No		**Resolution:**	fixed
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	17302

Description

I open a project that has a WMS layer defined, but I am offline. The project loads till it gets to the WMS layer then hangs indefinitely waiting for a response. The only option is to kill QGIS.

Manually edit the WMS layer out, or remove it when online and the problem disappears.

So QGIS needs to timeout very quickly if it receives no response and just switch the layer off, or some other smooth way of handling the error.

This is an issue on 1.8 but worth testing in 2.0

History

#1 - 2013-09-02 11:26 PM - Gavin Fleming

- Subject changed from unavailable WMS url block project load to unavailable WMS url blocking project load

#2 - 2013-09-03 02:07 AM - Giovanni Manghi

- Status changed from Open to Feedback

- Category set to Project Loading/Saving

Have you tested qgis master? I recall that this may have been fixed there.

#3 - 2013-09-27 04:37 AM - Giovanni Manghi

- Resolution set to fixed

- Status changed from Feedback to Closed

works as expected on qgis 2.0
