Easy fix?:	No	**Copied to github as #:**	17325

Description

Hello, this would be a very nice feature:

In the print composer, labels are not restricted by the frame of my composition, in fact most of the labels are cut.
Moving the content of the map, is not a solution with label moving along.
It would be nice to had a labelling option to "prevent" label to fall out of the page.

Best regards

Arthur

- Description updated

Already possible - just turn off "show partial labels" in the label settings for your project.
