

QGIS Application - Bug report #8586

Too much titles in the Legend from QGIS-server when single-symbol rendering

2013-09-08 06:30 AM - aperi2007 -

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Map Legend	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: end of life
Crashes QGIS or corrupts data:		Copied to github as #: 17328
Description		
<p>Hi,</p> <p>Actually qgis-server, when the render is single-symbol will return too much or noone label .</p> <p>Infact actually the qgis-deskto don't allow to set a label in the legend.</p> <p>It is allowed per the categorized render and for the rule render, but not for the single-symbol render.</p> <p>So in the qgis-server the legend is returned without any label.</p> <p>But If the user fill the Metadata field "Title" .</p> <p>QGIS-server will use this title for insert a label the legend, instead qgis-desktop ignore this setting for the label.</p> <p>QGIS-server so insert the title in the legend, but it will insert the label over the image and to the right of the image.</p> <p>This is too much.</p> <p>I put an image as example.</p>
