Re : searching for help and documentation in the QGIS site - search tool bug (any lowercase and uppercase distinction) ?

Hello,

I can not find pages in the QGIS site - http://qgis.org/en/site/ - using the keyword PostGIS...

But if I do type : Postgis , I do find the documentation page about PostGIS...

PS Please note that users are more familiar with the writing « PostGIS » than « Postgis » or « postgis ».

Maybe the search engine or the search index has to be fixed ?

http://qgis.org/en/search.html?q=PostGIS

Search

From here you can search these documents. Enter your search words into the box below and click "search". Note that the search function will automatically search for all of the words. Pages containing fewer words won't appear in the result list.

Search Results

Your search did not match any documents. Please make sure that all words are spelled correctly and that you've selected enough categories.

Thanks. I could not have figured it out by myself, because there is no « About this website » or « Contact webmaster team » link in pages.

So I will write it down in my own personal documentation and visit the GitHub QGIS-Website webpage.
