QGIS Application - Bug report #8692
Contextual Help - "What's this" - mostly missing

2013-09-26 08:35 AM - Jonathan Moules

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	GUI			
Affected QGIS version:	2.0.1	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	17413	

Description

The Help menu has a "What's this" icon (arrow plus questionmark). I tried it but it seems almost nothing has an entry.

I was going to list everything that didn't have an entry, but the easier option is to list what does:

Panels:

- Coordinate capture > "Start capture" button does (but nothing else)

 The main map panel.

- The Layers panel.

- The Overview panel.

- The Layer order panel

The other panels don't seem to.

Toolbars:

- Two things from the "Manage layers" toolbar have an entry (GPX and Add SQL Anywhere layer).

- Everything except "DBManager" on the databases toolbar

- Everything on the GRASS toolbar

- Everything except "spatial query" on the vector toolbar

And that's it. The other... 70? or so icons have nothing.

History

#1 - 2016-01-20 06:31 AM - Alexander Bruy

- Resolution set to fixed/implemented

- Status changed from Open to Closed

"What's this" removed from master. Reopen if necessary
