QGIS Application - Bug report #8694
Outdated in-application help for options

2013-09-26 09:01 AM - Jonathan Moules

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Documentation and Help			
Affected QGIS version:	2.0.1	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	17415	

Description

I went to Settings->Options.

Selected the "CRS" tab and clicked the "help" button. The help that comes up says:

> This dialog allows you to select some basic options for QGIS. There are eight tabs:
> General
> Rendering & SVG
> Map tools
> Overlay
> Digitizing
> CRS
> Locale
> Network & Proxy

There are (in 2.0.1) 11 tabs and only 5 of them are correctly listed in that list.

History

#1 - 2017-05-01 01:09 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

#2 - 2017-05-03 11:32 AM - Harrissou Santanna

- Resolution set to fixed/implemented

- Status changed from Open to Closed

- Description updated

The help system relies now on QGIS User Manual and all the tabs are described.
