

QGIS Application - Bug report #8707

Doesn't load most of the layers.

2013-09-27 09:13 AM - Giacomo Marchioro

Status: Closed	
Priority: High	
Assignee:	
Category:	
Affected QGIS version: 2.0.1	Regression?: No
Operating System: Mac	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: worksforme
Crashes QGIS or corrupts data: No	Copied to github as #: 17426
Description	
<p>I'm trying to open my old 1.8 project but QGIS 2.0.1 doesn't load most of the layers. "Handle bad layers" window appear but when a try to re-set the path QGIS crash. I've tried to open the same project with QGIS 1.8 and it works perfectly as for QGIS 2.0 for Windows XP the window doesn't appear at all. I think is a matter of numbers because the layer that QGIS 2.0 doesn't load are alphabetically after the "s".</p>

Can you share a problematic project?

#2 - 2013-09-30 06:20 AM - Giacomo Marchioro

- File Parete_Sud.qgs added

Unfortunately I've a lot of raster files with data that I can't share. I'm trying to create a new project loading programmatically a bunch of rasters file to see when it happens and to share it instead of my project but following the QGIS tutorial with python http://www.qgis.org/en/docs/pyqgis_developer_cookbook/loadlayer.html I'm stuck at the second line: fileInfo = QFileInfo(fileName). It return me an error: NameError: name 'QFileInfo' is not defined. mah...

#3 - 2013-11-21 11:33 PM - Matthias Kuhn

you need to

```
from PyQt4.QtCore import QFileInfo
```

or just import all the important PyQt stuff

```
from PyQt4.QtCore import *
from PyQt4.QtGui import *
```

Concerning your main problem: Just a wild guess: Is it possible, that your machine is running out of memory?

#4 - 2014-01-26 10:54 AM - Giovanni Manghi

- Resolution set to worksforme

- Status changed from Feedback to Closed

Closing for lack of feedback and lack of sample data to allow us replicate the issue. Please reopen if necessary.
