Crashes QGIS or corrupts data:		**Copied to github as #:**	17433

Description

Virus in QGIS 2.0.1 & 2.1.0 windows installer.
The file "sqlite3.dll" reported to virus.

I download newest sqlite3.dll from http://sqlite.org/. It works well.

History

#1 - 2013-09-28 03:00 AM - Nathan Woodrow

Most likely a false positive. What is the software used and what is the warning.

#2 - 2013-09-28 03:03 AM - Paolo Cavallini

- Resolution set to invalid

- Status changed from Open to Closed

#3 - 2013-09-28 03:06 AM - Jukka Rahkonen

It may be a false alarm and therefore issues like this could perhaps be discussed first on the users mailing list. Up-to-date F-Secure virus scanner did not complain about the file. What software did you use?

http://www.jiangmin.com/
sqlite3.dll from official site works for me.
I have no time to care about these things.
Check it yourself.
