

QGIS Application - Bug report #872

Error in C++ plugin templates files

2007-12-16 05:06 AM - Fernando Pacheco -

Status: Closed	
Priority: Low	
Assignee: Magnus Homann	
Category: C++ Plugins	
Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 10931
Description	
<p>I believe that there is an error in the archives plugin.cpp and plugin.h in the src/plugins/plugin_template directory. That error makes the menu QGis act in odd ways.</p> <p>The problem is that the source code doesn't use the interface to create the toolbar.</p> <p>Steps to reproduce the error:</p> <ol style="list-style-type: none">1 - create a plugin in C++ with the python script (plugin_builder.py);2 - compile the plugin;3 - load the plugin in QGis;4 - close QGis;5 - run QGis -> The application menu acts abnormally. <p>Thanks. Fernando.</p>	

History

#1 - 2007-12-16 07:08 AM - Magnus Homann

- Status changed from Open to In Progress

#2 - 2007-12-16 07:09 AM - Magnus Homann

This applies also to eVis, thanks for finding it!

I have submitted ticket to eVis

#3 - 2007-12-16 02:12 PM - Magnus Homann

- Resolution set to fixed

- Status changed from In Progress to Closed

Fixed in commit:ece9d9b5 (SVN r7797), together with some translation fixes.

#4 - 2009-08-22 12:54 AM - Anonymous
