QGIS Application - Bug report #8726
Attribute table in Map Composer has no content

2013-09-30 02:25 AM - Andreas Pointner

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Map Composer/Printing			
Affected QGIS version:	2.0.1	**Regression?:**	No	
Operating System:	Win8	**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	invalid	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	17442	

Description

I make a QGIS Plugin and I try to use the map composer to print a .pdf Map.

In this Map I like to display the attribute table of a layer.

If I open the pdf the table is shown but I do not have a content.

The Layer is valid.

History

#1 - 2013-09-30 04:40 AM - Giovanni Manghi

- Target version changed from Version 2.0.0 to Future Release - High Priority

- Status changed from Open to Feedback

So this happens just when using your plugin or happens also when you use directly the qgis print composer?

#2 - 2013-09-30 04:55 AM - Andreas Pointner

Its only at my plugin.

In the plugin i make a new composer and i use the code from the cookbook. (http://www.qgis.org)

#3 - 2013-09-30 07:35 AM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Feedback to Closed

I don't think the code in the cookbook has been (completely) updated to the new api in qgis 2.0

Better ask for help in the developers mailing list. If an issue is confirmed then we can reopen this ticket.

cheers!
