

QGIS Application - Bug report #8735

Automatic red alignment lines stay visible

2013-10-01 05:48 AM - pvanbosgeo -

| Affected QGIS version: | 2.0.1 | Regression?: No |
| Operating System: | Linux (Ubuntu) | Easy fix?: No |
| Pull Request or Patch supplied: | No | Resolution: |
| Crashes QGIS or corrupts data: | No | Copied to github as #: 17450 |
| Description | | |
| <p>When using 'snap to alignment', red alignment lines appear that help to align the objects. Normally they are only visible while moving objects, but also often they remain visible. The biggest problem is that these lines are also visible when saving the map as e.g., png image file. Only thing that sometimes helps is moving the objects up and down till the lines disappear. However, this does not always seem to help.</p> | | |

Is this reproducible in current dev version? That code area has been changed significantly in 2.1 and I'm confident this bug is fixed.

Sorry for the late response... but yes, this is not an issue anymore.
