

QGIS Application - Feature request #8794

Automatically clean NULL text from attribute edit form line edit

2013-10-07 11:52 PM - marish -

Status:	Open	Resolution: Copied to github as #: 17495
Priority:	Normal	
Assignee:		
Category:	Unknown	
Pull Request or Patch supplied:	Not supplied	
Easy fix?:	No	
Description		
<p>Currently when using identify tool to open vector object attribute editing dialog, all empty text fields are shown as NULL (which is OK). The only issue - to enter any value one has to manually delete NULL text from the entry field. There is no "clear" button (as it appears only if field has any non-NULL value), clicking on field doesn't preselect NULL for faster deletion. Only backspace or del key works. Paste into "empty" (NULL) field results into "NULLmy pasted text" value. Using "clear" button resets field back to NULL string and only way how to get rid of it is to use delete/backspace key.</p> <p>Correct behaviour would be to clean field on focus. As currently QGIS knows when field has NULL value (hint - see "clear" button), resetting entry field to "" on focus shouldn't be so hard.</p> <p>If it sounds like a rant, then yes, it is. After deleting few hundreds times NULL text, anyone will be ready to write a rant :P</p> <p>Related to #2742</p> <p>QGIS versija 2.1.0-Master QGIS code revision dae9b5d</p>		

History

#1 - 2013-10-12 01:46 AM - Matthias Kuhn

I would prefer to have a NULL checkbox next to the field instead of having the NULL text.

#2 - 2014-12-12 05:31 AM - Jürgen Fischer

- Subject changed from *Automaticly clean NULL text from atribute edit form line edit* to *Automatically clean NULL text from attribute edit form line edit*

#3 - 2017-05-01 12:48 AM - Giovanni Manghi

- Easy fix? set to No
