

QGIS Application - Bug report #881

Excessive zoom-in after 'Zoom to layer extent'

2007-12-27 12:01 PM - cdavila -

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Map Canvas	
Affected QGIS version:	Regression?: No
Operating System: Debian	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 10940

Description

When you make *Zoom to layer extent* on point layers, some of the points are partially or even completely out of the Map View and its necessary to zoom out a little bit to be able to see them.

IMHO also with other feature types *Zoom to layer* is excessive and it would be better to have some space around the zoomed layer.

History

#1 - 2008-01-13 01:32 PM - Magnus Homann

- Resolution set to fixed

- Status changed from Open to Closed

Sounds reasonable, let's try scalining extent with 5%. Fixed in commit:8ecffa69 (SVN r7950)
