Pull Request or Patch supplied:		**Resolution:**	duplicate
Crashes QGIS or corrupts data:		**Copied to github as #:**	17540

Description

Hi,

I tried zebra frame in the composer today and it looks fine on the screen
but when I import into PDF or print I see that white blocks are not printed
correctly: just white space in place of white rectangles.

This is 2.1.0-Master build e04b426

See attached file it illustrates the problem.
