Pull Request or Patch supplied:		**Resolution:**	fixed
Easy fix?:	No	**Copied to github as #:**	10946

Description

Submitted by Barry Rowlingson:

Matt,

I've just been playing with QGIS 0.9.1, and the python plugin
installer dialog annoyed me when I couldn't resize it properly to read
long descriptions!
So I grabbed the .ui file from SVN and arranged the widgets in nice
layout boxes - a minute's work in QT Designer. Load this attached ui
file up and stretch away!
I suppose if you need a legal notice then I hereby disclaim any rights
in the file whatsoever... It's all yours.
Now I'll figure out why it wouldn't install a plugin into Windows...
Permission error? In a single-user operating system :) ?
