QGIS Application - Bug report #893
New Plugin manager gui difficult to use

2008-01-07 04:43 PM - Gary Sherman

Status:	Closed		
Priority:	Low		
Assignee:	Tim Sutton		
Category:	GUI		
Affected QGIS version:		**Regression?:**	No
Operating System:	Debian	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	10952

Description

The table listing the plugins doesn't have the focus when the dialog comes up. This requires two clicks to change the status of a plugin. In addition, the blue highlighting of just the plugin name when changing status is a bit distracting. Either the whole row should be highlighted or no highlighting should take place.
