Why do you think it's a Feature and not a documentation "bug"

it:
perche' pensi che sia una feature e non un bug della documentazione?

Nessun problema :)

chiudi tu questa feature e apri nelle issue?

grazie

- Target version set to Future Release - High Priority
- Crashes QGIS or corrupts data set to No
- Affected QGIS version set to 2.0.1
- Category set to Documentation and Help
- Subject changed from Guida contestuale italiano to Error in QGIS help about docked table of attributes.
- Tracker changed from Feature request to Bug report

It is wrong also in English, this is why it is also wrong in Italian.

New description:

in QGIS help, table of attributes, the path to point the user to the option to dock the table is wrong.

This could be closed I think. I fail to find the attached dialog in recent QGIS versions and doc system is now based on QGIS User Manual.

- *Status changed from Open to Closed*
- *Resolution set to invalid*
