

QGIS Application - Bug report #896

Quickprint Plugin scaling issues

2008-01-09 11:14 AM - John Tull

Status:	Closed	
Priority:	Low	
Assignee:	Tim Sutton	
Category:	C++ Plugins	
Affected QGIS version:		Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:		Resolution: wontfix
Crashes QGIS or corrupts data:		Copied to github as #: 10955
Description		
<p>In Quickprint plugin on OS X, 0.9.2 from trunk, scaling problems are apparent with the legend, title and map. Possibly dpi is not actually at default 300. Text in legend and legend symbols are quite tiny. Title text is quite large.</p>		

History

#1 - 2008-08-24 01:08 AM - mesajs -

Quickprint on Windows Vista 64 bit: Labels on map features are way to large. e.g. set font to Arial 10 points, but lettering on printed map is over 5mm high, obliterating map. Not so much a problem if font size is set to map units.

Applies to versions 0.11.0-1 and 0.11.0-2

#2 - 2008-11-01 09:08 AM - Marco Hugentobler

- Status changed from Open to Closed
- Resolution set to fixed

I think this is fixed with the latest changes in Quickprint. Feel free to reopen the bug if not.

#3 - 2008-11-01 09:56 AM - John Tull

- Status changed from Closed to Feedback
- Resolution deleted (fixed)

The fonts appear good. I ran a test print to a large format (B1) and it worked well. The qgis logo, scalebar, and north arrow are disproportionately large compared to the rest. I've attached the example to the ticket. Is this still a scaling issue?

#4 - 2009-07-04 11:08 AM - Giovanni Manghi

Made the same test on QGis 1.2 on both Linux and Windows, and the problem is replicable.

On Windows text is even smaller than on linux.

Here is a link were you can downloads two pdf obtained with the same data, in B1 format, with the same font (type and size), on Linux and Windows.

See attached files.

Pushing the milestone to 1.2.

#6 - 2010-06-11 11:08 AM - Paolo Cavallini

Still true?

#7 - 2010-06-11 12:09 PM - John Tull

Text appears to be better for me. The qgis icon is quite large, as in the original sample file I attached.

#8 - 2010-10-23 01:37 AM - Paolo Cavallini

Please note that [[QuickPrint]] plugin will probably be removed from future versions of QGIS, as better options are available.

#9 - 2011-03-02 07:12 AM - Paolo Cavallini

Would 1.7 release the right time to remove [[QuickPrint]] and close this bug?

#10 - 2011-03-02 01:12 PM - John Tull

I'm happy to see this changed to wontfix if so.

#11 - 2011-03-02 01:18 PM - Tim Sutton

- Status changed from Feedback to Closed

- Resolution set to wontfix

I've removed this plugin with commit:f6c16778 (SVN r15314). Users wanting similar functionality should use the [[QuickPrint]] plugin rather.

Thanks

Tim

Replying to [comment:12 timlinux]:

I've removed this plugin with commit:f6c16778 (SVN r15314). Users wanting similar functionality should use the [[QuickPrint]] plugin rather.

Thanks

Tim

Correction I meant to say "Users wanting similar functionality should use the **EasyPrint** plugin rather."
