

QGIS Application - Bug report #8964

GDAL Translate Problem on QGIS 2.0.1

2013-10-28 09:04 PM - Akbar Gumbira

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Rasters	
Affected QGIS version:	2.0.1	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 17628
Description I got a problem on gdal_translate. I used raster conversion to translate a *bil file to *asc file. When I opened the result on notepad, I can't read my result and I think that was a wrong asc format. Then I checked at the command on translate window, for QGIS 2.0.1 gdal_translate always convert to -GTiff (Please refer to attachment: 2_asc_qgis.png) even I converted to *grd file or other format. It works on QGIS 1.8. Environment: OS: Windows 8 and Ubuntu 12.04 QGIS Version is attached

History

#1 - 2013-10-28 09:06 PM - Akbar Gumbira

It works on QGIS Master (f7beac6)

#2 - 2013-10-29 04:17 AM - Giovanni Manghi

- Resolution set to invalid
- Status changed from Open to Closed

already fixed in master.

#3 - 2013-12-10 06:11 PM - Nicolas Cadieux

- Status changed from Closed to Reopened

See #9156. Both issue seem related.

#4 - 2013-12-11 06:57 AM - Giovanni Manghi

- Status changed from Reopened to Closed

this is fixed in qgis master.

#5 - 2013-12-18 09:28 PM - Alex Mandel

Just for the record, the issue as discussed on the mailing list with a workaround.
