Description

I've tried connecting to our (Ordnance Survey's) WMTS paid service in QGIS 2.0.1. It appears to connect ok and returns the list of layers from our GetCapabilities (a copy of which I've pasted below). However when I try to add any of these layers in only one tile is shown.

From looking at our access logs we can see that QGIS correctly requests 1 tile but then no other tiles are requested.

Our service uses a key/referrer authentication so I have been adding the appropriate referrer into the relevant referrer box in QGIS. I've also been putting in the full ...REQUEST=WMTS& etc to identify it as a WMTS.
