QGIS Application - Bug report #9042
Point displacement circle line width

2013-11-11 04:04 AM - Pekka Sarkola

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Symbology			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	17696	

Description

Hi!

I need to remove circle between displaced point (with "Point Displacement"). If I use line width 0.00, line still exists. With 0.01 it is very thin: almost same thing than 0, but still with different option circle lines will be drawn. See attached image.

QGIS master (891fa7c)

Rgs,

Pekka

History

#1 - 2015-11-03 06:13 PM - Nyall Dawson

- Resolution set to fixed/implemented

- Status changed from Open to Closed

Fixed in 2.12 - now the circle can be made totally transparent to avoid drawing it
