<b>Assignee:</b>		
<b>Category:</b>	Map Composer/Printing	
<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b> fixed/implemented
<b>Easy fix?:</b>	No	<b>Copied to github as #:</b> 17712
<b>Description</b>		
<p>I've made PR <a href="https://github.com/qgis/QGIS/pull/995/files">https://github.com/qgis/QGIS/pull/995/files</a> to make scalebars more rational (under my point of view) and also make it possible to use nautical miles on scalebars.</p> <p>I've tested it against WGS84, non projected projects and works ok, but with a, say so, projected project it doesn't look good, maybe in relation with bug #9050</p> <p>I think it could be a good start point/idea for a more useful scalebars in composers.</p>		

#### History

##### #1 - 2013-11-16 09:25 AM - Antonio Locandro

I would find this very useful! In my area of work we need NM support, even for measuring distances and input of distance also

##### #2 - 2014-01-14 07:30 PM - Nyal Dawson

- Resolution set to fixed/implemented
- % Done changed from 0 to 100
- Status changed from Open to Resolved

##### #3 - 2014-01-15 12:39 AM - Jürgen Fischer

- Status changed from Resolved to Closed
- Subject changed from Support for nautical miles and more rational scalebars in composer to Support for nautical miles and more rational scalebars in composer

implemented in commit:4fd3b1fb076aae2ad2e60460e33f39833b8cad83
