Description

I've made PR https://github.com/qgis/QGIS/pull/995/files to make scalebars more rational (under my point of view) and also make it possible to use nautical miles on scalebars.

I've tested it against WGS84, non projected projects and works ok, but with a, say so, projected project it doesn't look good, maybe in relation with bug #9050

I think it could be a good start point/idea for a more useful scalebars in composers.

History

I would find this very useful! In my area of work we need NM support, even for measuring distances and input of distance also

#2 - 2014-01-14 07:30 PM - Nyall Dawson

- Resolution set to fixed/implemented

- % Done changed from 0 to 100

- Status changed from Open to Resolved

#3 - 2014-01-15 12:39 AM - Jürgen Fischer

- Status changed from Resolved to Closed

- Subject changed from Suport for nautical miles and more rational scalebars in composer to Support for nautical miles and more rational scalebars in composer

implemented in commit:4fd3b1fb076aae2ad2e60460e33f39833b8cad83
