I second that. It's not very usable if you have to restart Qgis to see the change.

#2 - 2014-05-08 02:37 PM - Antonio Locandro

Another issue is that the Reset button does nothing, so if you customize something you can't reset

#3 - 2014-06-21 04:20 AM - Jürgen Fischer

- Category set to Customisation Framework

#4 - 2014-06-21 06:39 AM - Giovanni Manghi

- Priority changed from Normal to Low
- Tracker changed from Bug report to Feature request
- Subject changed from Toolbar Customization to Apply Customizations without restarting QGIS
- Operating System deleted (Windows 7)
- Target version set to Future Release - Lower Priority

#5 - 2017-05-01 12:48 AM - Giovanni Manghi

- Easy fix? set to No
