QGIS Application - Bug report #9087
Resizing log window causes massive map updates

2013-11-19 04:01 AM - Noone Noone

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	GUI			
Affected QGIS version:	2.0.1	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	duplicate	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	17732	

Description

If you resize the log window (because you might want to see if there occurs something strange), QGIS will try to do a map refresh every pixel you move your mouse to drag the window border. This slows down enormously, esp. if you have WMS layers added.

Suggestions:

- use a buffered map image that can be displayed while performing this actions
- update only after fully resized the window
