QGIS Application - Bug report #9091
Field calculator toolbar item disabled in edit mode

2013-11-19 06:23 AM - Noone Noone

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	GUI		
Affected QGIS version:	2.0.1	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	17736

Description

The Field calculator button in toolbar is disabled when switching in editmode of a vector layer. You need to go Attribute table -> field calculator.

History

What do you suggest?

Personally, I think it would be nice if clicking on the toolbar's Field Calculator activated the "editing mode" and opened the Field Calculator Panel.

#2 - 2013-11-19 07:16 AM - Noone Noone

The button needs to follow the same states as the button at the attribute table (consistency).
Enabling edit-mode can be done, but then the use of keeping this write-lock might be questionable?

#3 - 2013-11-19 08:31 AM - Jürgen Fischer

apparently master is not affected, but it's reproducable on 2.0.1

#4 - 2013-11-19 09:29 AM - Giovanni Manghi

- Target version set to Future Release - High Priority
- Status changed from Open to Feedback

then closing as usual in this cases?

#5 - 2014-01-11 06:26 AM - Salvatore Larosa

This should happen (in 2.0.1) only for point layer, with line and polygon layer should be working.

I had fixed this issue in commit:e6154cf4c8dc170ef6e7e7830ff27781a5e0be5a

Thanks Salvatore :)

#7 - 2014-03-24 07:17 AM - Alexander Bruy

- Status changed from Feedback to Closed

- Resolution set to fixed/implemented

Should be fixed. Reopen if necessary.
