

QGIS Application - Bug report #9103

Error downloading OSM data

2013-11-20 11:39 AM - Noone Noone

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:	2.0.1	Regression?: No
Operating System:	Ubuntu	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #: 17748
Description <p>Hi, QGIS 2.0 introduces a new OSM tool that allows to get the corresponding area of a layer directly from OSM and store it in a .osm XML file.</p> <p>I tried multiple times, but just get always this response:</p> <pre>Error downloading http://overpass-api.de/api/interpreter?data=(node(7.11345e+06,1.27115e+06,7.11383e+06,1.27162e+06);%3C;);out; - server replied: Bad Request</pre> <p>Comparing with the official request, it seems that coordinates need to be formatted without exponents and maybe the end is wrong. http://wiki.openstreetmap.org/wiki/Overpass_API/Language_Guide#All_data_in_a_bounding_box</p> <p>Obviously, the call is wrong constructed</p> <p>P.S. I guess more OSMappers will come and work with QGIS. So I recommend to create an appropriate category :)</p>
