Description

You can open an attribute table linked to a vector, select some rows and copy the data by the 'copy selected rows' icon.
But when you paste it in a spreadsheet you have a mix from datas and coordinate of the correspettive feautures and your copied datas are lost.

History

Try with line or polygons. It works with points.

#2 - 2008-08-05 01:10 AM - gjm -

- Resolution set to fixed

- Status changed from Open to Closed

Fixed in . Have changed the field separator from a comma to a tab as the WKT for lines and polygons has commas in it.
