QGIS Application - Bug report #9112
QGIS master crashes on Linux when editing Spatialite layers with OTFR on

2013-11-22 07:16 AM - Giovanni Manghi

Status:	Closed		
Priority:	Severe/Regression		
Assignee:			
Category:	Digitising		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	worksforme
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	17753

Description

Open the layers in the attached SL db (you may want to use the attached project), then activate OTFR and try edit one of the line layers.

QGIS will crash.

QGIS 2.0 won't crash but will flood the log with the messages described here

#8451

QGIS master on Windows/OSGeo4w won't crash, but still give the messages described in the above ticket.

Tested on Ubuntu and the nightly-build repo.

History

#1 - 2014-01-26 12:37 PM - Giovanni Manghi

- Resolution set to worksforme

- Status changed from Open to Closed

seems to work as expected on the latest master.
