

QGIS Application - Bug report #9114

Ellipse renderer always draws black ellipses in combination with color functions

2013-11-23 03:59 AM - Anita Graser

Status: Closed	
Priority: Normal	
Assignee:	
Category: Symbology	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 17755
Description	
<p>In other renderers, it is possible to use color functions such as <code>color_rgb(100,255,255)</code> to change the fill and outline colors. The ellipse renderer only returns black ellipses if used with these functions.</p> <p>The only thing that seems to work for ellipse renderers is the '#ff0000' notation.</p> <p>Tested with today's nightly on Win7 but seems to affect all platforms.</p>
