QGIS Application - Feature request #9126
Extend layer window with toolbar

2013-11-26 03:53 AM - Noone Noone

Easy fix?:	No	**Copied to github as #:**	17763

Description

Currently tools that are related to the layer widget are only within the context menu of layers. This is bad, as

- they are 'hidden' by default
- they don't refer to the current clicked layer, but to all layers (more specific: the layer list itself)

So I suggest to move the expand/collapse/add group feature to a smal toolbar at the top of the layer window. You might have a look how the Eclipse team designed it:

!eclipse outline window.png!

History

#1 - 2014-03-26 07:12 AM - Noone Noone

- File gimp_layer_window.png added

Also a layer visibility/opacity/composition options would be nice, as they can then moved here from the layer properties dialog.
