QGIS Application - Bug report #913 svn trunk has been failing to build for several days now

2008-01-17 01:24 AM - Maciej Sieczka -

Status:ClosedPriority:LowAssignee:nobody -Category:Build/Install

Affected QGIS version:

Operating System: Debian

Pull Request or Patch supplied:

Crashes QGIS or corrupts data:

Regression?: No

Resolution: fixed

Copied to github as #: 10972

Description

The SVN trunk checked out with:

svn co https://svn.qgis.org/repos/qgis/trunk/qgis

has been failing to build for several days now with it's last words being:

[29%] Building CXX object src/gui/CMakeFiles/qgis_gui.dir/qgsquickprint.o

/home/maciek/src/straight/qgis09/src/gui/qgsquickprint.cpp:48:24: error: QSvgRenderer: No such file or directory /home/maciek/src/straight/qgis09/src/gui/qgsquickprint.cpp: In member function 'void [[QgsQuickPrint]]::printMap()': /home/maciek/src/straight/qgis09/src/gui/qgsquickprint.cpp:609: error: 'QSvgRenderer' was not declared in this scope /home/maciek/src/straight/qgis09/src/gui/qgsquickprint.cpp:609: error: expected @;' before 'mySvgRenderer' /home/maciek/src/straight/qgis09/src/gui/qgsquickprint.cpp:610: error: 'mySvgRenderer' was not declared in this scope maker2: *** [src/gui/CMakeFiles/qgis gui.dir/qgsquickprint.o] Error 1

maker1: *** [src/gui/CMakeFiles/qgis_gui.dir/all] Error 2

make: *** [all] Error 2

Using amd64 Ubuntu Dapper, QT 4.3.3 built from source. I used to be able to build SVN trunk without problems before.

History

#1 - 2008-01-17 09:58 PM - Gavin Macaulay -

Yes, I had this problem too. I resolved it by editing the qgsquickprint.cpp file and changing line 48 (#include <QSvgRenderer>) to include the directory name that the QSvgRenderer file in (I'm not in front of my computer at the moment, I think it was svg: hence it became #include <svg/QSvgRenderer>.

Haven't had time to work out while it worked for some people, but not me (and now you).

Gavin

Hi Gavin

Maybe QGIS build process is looking for the file at some hardcoded location, where most users have it, thus it works for them, but not for us? I'm using QT 4.3.3 built from source installed to a custom dir /usr/local/qt4. In my case the file in question is at:

cat /usr/local/qt4/include/QtSvg/QSvgRenderer #include "qsvgrenderer.h"

#3 - 2008-01-23 01:55 AM - Maciej Sieczka -

It's been about 3 weeks now since I've been unable to build QGIS.

#4 - 2008-02-11 02:52 AM - sieczka -

2 weeks more and still the build fails at this stage.

Once I change line 48 of qgsquickprint.cpp from:

#include <QSvgRenderer>

into:

#include <QtSvg/QSvgRenderer>

the build proceeds. I need this hack only on my Ubuntu Dapper box, where QT (4.3.3) is installed from source into /usr/local/qt4, having QSvgRenderer include available at:

cat /usr/local/qt4/include/QtSvg/QSvgRenderer #include "qsvgrenderer.h"

On Kubuntu Gutsy, using stock QT 4.3.2, I don't need this hack.

#5 - 2008-04-11 05:22 AM - Jürgen Fischer

Is this still the case?

#6 - 2008-04-11 06:28 AM - Maciej Sieczka -

Replying to [comment:5 jef]:

Is this still the case?

I don't have any machine now that would use a custom build of QT, installed in a non standard place, to check it.

However, I have never seen any action in order to fix the bug (I follow all QGIS MLs, including SVN commit ML).

#7 - 2008-05-14 03:15 PM - Jürgen Fischer

- Status changed from Open to Closed
- Resolution set to fixed

commit:6f03494d (SVN r8439) should fix this.

#8 - 2009-08-22 12:54 AM - Anonymous

Milestone Version 0.9.2 deleted
