

## QGIS Application - Bug report #9135

### PostGIS - materialized views only show if "also list tables with no geometry" is ticked

2013-11-27 12:43 PM - Nyall Dawson

<b>Status:</b>	Closed

<b>Description</b>			
<p>PostGIS materialized views are not shown in the "Add PostGIS table" dialog UNLESS "also list tables with no geometry" is ticked, even if they have geometry columns.</p> <p>Expected behaviour is that materialized views would show with "also list tables with no geometry" UNTICKED if they do have a geometry column.</p>

#### History

##### #1 - 2013-11-27 02:31 PM - Jürgen Fischer

- Affected QGIS version changed from 2.0.1 to master

Not reproducible here using PostgreSQL 9.3 with PostGIS 2.1. Here materialized views only disappear when 'Only look in layer registries' is checked.

##### #2 - 2013-11-27 02:38 PM - Nyall Dawson

Do you have "Don't resolve type of unrestricted columns (geometry)" ticked? (I do). Perhaps this bug is only triggered when that is ticked..?

No. But that can also cause this as materialized views also don't have geometry type constraints.

Is this an issue that will be solved? Or maybe it needs some hints on the GUI/help side?

I can't reproduce it. I see a materialized views when "Also list tables with no geometry" is not checked - whether or not I check "Don't resolve type of unrestricted columns (geometry)" doesn't matter.
