

QGIS Application - Bug report #9162

Crash when typing something into python editor

2013-12-04 04:54 AM - giovanni meles

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	PyQGIS Console	
Affected QGIS version:	2.0.1	Regression?: No
Operating System:	Ubuntu	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 17795
Description		
<p>When I write something into the python editor, QGIS crashes. When running from the command line, i get this warning:</p> <pre>Warning: void DBusMenuExporterPrivate::addAction(QAction*, int): Already tracking action "Werkzeugkiste" under id 311 ERROR 1: Problem reading /home/valentino/.qgis2/gdal_pam/gdal_pam_proxy.dat header - short or corrupt? QGIS died on signal 11Could not attach to process. If your uid matches the uid of the target process, check the setting of /proc/sys/kernel/yama/ptrace_scope, or try again as the root user. For more details, see /etc/sysctl.d/10-ptrace.conf ptrace: Die Operation ist nicht erlaubt. No thread selected No stack. gdb returned 0 Abgebrochen (Speicherabzug geschrieben)</pre> <p>This also happens when I deactivate all my additionally activated plugins.</p>

- Status changed from Open to Feedback

I think this is not related to the console code, please could you try the latest master code ?

Also could you provide more info about the crashes ?
