

QGIS Application - Bug report #9178

gdal_merge

2013-12-09 05:11 AM - Lene Fischer

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:	2.0.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 17807
Description I have a problem while using gdal_merge from Raster>Miscellaneous>Merge While setting No data value the result comes out with the no data. So my value ranges from -9999 to 54.8 The correct value is -1.2 to 54.8 Using Weekly from december 2. 2013 Regards Lene Fischer

What is the nodata value you are using, is it -9999 ?

Can you try to add the following to the command (by clicking on the pencil icon)

-a_nodata -9999

I have made a pull request [1] to fix a similar issue reported on the mailing list [2]

[1] <https://github.com/qgis/QGIS/pull/1021>

[2] <http://osgeo-org.1560.x6.nabble.com/No-data-value-in-Raster-Merge-not-working-t5091670.html>

Thanks - this works! Hope it will be fixed.

Inserting this text

```
gdal_merge.bat -a_nodata -9999 -of GTiff -o "C:/Users/Lene Fischer/Desktop/raster/Samlet3" "C:/Users/Lene Fischer/Desktop/raster/DTM_618_69.asc"
"C:/Users/Lene Fischer/Desktop/raster/DTM_619_69.asc"
```

No I hope my 60 students tomorrow can do the same :-)

Regards

Lene Fischer
