Easy fix?:	No	**Copied to github as #:**	17826

Description

Following from #9134

I'd suggest that only one column should be shown "Label". If label is empty then show the ObjectName.
Showing the objectName as standard as is done currently only adds clutter. The "Description" column is empty for everything I've looked at so seems superfluous; no-one is using it.

This would create a customisation panel that is much easier to read and therefore use.
