<b>Description</b>		
<p>I'm using QGIS 2.0 on a Panasonic Toughpad, running Android 4.0.3.</p> <p>I once 'full-screened' my Layers panel and now it can't be un-done. There is no button / panel-size to de-size it to its original form.</p> <p>In the View - Panels menu, Layers is checked, but not visible.</p>
