

QGIS Application - Bug report #9228

Cannot use layer order if non-geometric layers are used

2013-12-17 11:36 PM - Denis Rouzaud

Status: Closed	
Priority: Normal	
Assignee:	
Category: Map Legend	
Affected QGIS version: 2.0.1	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 17849

Description

If you have non-geometric layers and want to use the custom layer order, it is disabled every time you re-open the project.

This message appears in the log:

The problem comes from the fact that **sometimes** `drawingOrder="-1"` in the legend node for the non-geometric layers.

And then, in `QgsLegend::verifyDrawingOrder`, if a legend layer has `drawingOrder < 0`, it will reorder the layers according to the legend.

History

#1 - 2013-12-17 11:37 PM - Denis Rouzaud

The message is: Not fully defined drawing order set to legend order.

#2 - 2013-12-17 11:41 PM - Jürgen Fischer

what is a "non-geometric" layer?

#3 - 2013-12-17 11:43 PM - Denis Rouzaud

only data, a postgres layer without geometry column for instance

#4 - 2014-02-07 05:23 AM - Giovanni Manghi

- Priority changed from High to Normal

There is no crash or data corruption, so I'm lowering the priority.

#5 - 2015-02-08 11:55 PM - Denis Rouzaud

- Status changed from Open to Closed
