

QGIS Application - Bug report #923

can't set "Grayscale Band Selection=Red" in Polish interface, but do can in English one

2008-01-30 03:14 AM - Maciej Sieczka -

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Rasters	
Affected QGIS version:	Regression?: No
Operating System: Debian	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 10982
Description	
<p>When I start QGIS with English interface, the "Raster Layer Properties > Symbology > Render As=Single Band Gray > Grayscale Band Selection" let's me choose between "Red/Green/Blue/Not Set". Ok.</p> <p>But in Polish interface (my native language), the same sequence let's me choose from "Brak/Green/Blue/Not Set". Pay attention to "Brak" instead of "Red"; "Brak" in Polish means "Not Set" or "missing". And selecting it results in a colortable as if "Not Set" was chosen indeed.</p> <p>Summary: there is no way to select "Red", but there are 2 ways of choosing "Not Set" in Polish interface.</p> <p>SVN r8095, built and running against QT 4.3.3.</p>
