

QGIS Application - Bug report #9244

Paste in place doesn't work across pages anymore

2013-12-21 05:31 AM - Olivier Dalang

Status: Closed	
Priority: Severe/Regression	
Assignee: Nyall Dawson	
Category: Map Composer/Printing	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 17862
Description	
<p>In 2.0, when working on multi-pages composers, you could copy-in-place an item from a page to another (the item would be copied at the same position, but on the page which is under the mouse).</p> <p>This does not work anymore in 2.1.</p> <p>Since it's a regression, I flag it as blocker (right?)</p>

- Status changed from Open to Feedback

I can't replicate this... are you able to re-test and give me steps to reproduce it? Thanks!

#4 - 2014-01-22 12:51 AM - Nyall Dawson

- Category set to Map Composer/Printing

#5 - 2014-01-22 03:47 AM - Olivier Dalang

Steps to reproduce (tested in 06b1 fbc):

- 1) create a new file
- 2) create a new composer
- 3) set number of pages to 2
- 4) create a rectangle on the first page

- 5) copy that rectangle
- 6) move the mouse cursor to the second page (hover only, no click involved)
- 7) paste in place (ctrl+shift+v)

In 2.0.1, the rectangle was pasted on the same position but on the second page.
In master, the rectangle is pasted over the first one.

#6 - 2014-01-22 11:55 AM - Nyal Dawson

- *Status changed from Feedback to Closed*

Fixed in changeset commit:"9aa4155e36c01e4fb5f851faa44a05c8764c4279".
